Subject: RE: Discuss MT Nutrient Rules

Tina,

Here is the language I came up with after our conversation Friday afternoon. Let's plan on discussing it tomorrow afternoon.

(6) Based on the triennial review, and with respect to both general and individual variances, the department must issue draft findings and conclusions, provide public notice of the draft findings and conclusions, and solicit public comments. The notice must solicit comments on whether each variance should :

- (a) remain in effect;
- (b) be modified; or
- (c) be terminated.

(7) The notice required in (6) must include general variance categories and the interim limits for each category, but it need not specific facilities included in each category. Based on the review and public comment, the department shall prepare final findings and conclusions, provide the environmental protection agency with a copy of the final findings and conclusions, and either:

- (a) initiate rulemaking to implement the final findings and conclusions; or
- (b) if the final findings and conclusions indicate that the interim limits should remain in effect and not be changed, take no further action in response to the triennial review.

John
